Tracy, just to be clear – the documents 166343 – 166535 were produced to you on disk number 166157. I am enclosing a pdf that we made of the spreadsheets for your records.

Subject: RE: Tuomey claims data

Did Richard send them by regular mail? If so, they may not have reached us yet. Incredibly, I just got something today that Joe Griffith sent Jan. 12. For these productions, we would really appreciate receiving them by overnight or second-day courier. Not trying to increase costs, but they are still irradiating mail that comes to us through regular USPS delivery and it can take weeks to get here.

Thanks for checking, Jonathan.

To: Hilmer, Tracy (CIV); Acker, Norman (USANCE); O'Donnell, Niall (CIV)
Cc: Jonathan Harling; Mary G. Lewis
Subject: RE: Tuomey claims data dictionary and field layouts

Tracy: the letter we sent was intended to address Norman's letter revised RFAs only. I plan to send you a separate letter dealing with the other items we discussed. I was waiting to hear from you about the status of Ruben Steck's errata sheet, since one of the points in your letter dealt asked for more specificity as to what portions of his report we disputed. Now that you have informed me that it is coming, I can get you a letter addressing the other items by Friday. As for the call with Mr. Steck and the hospital people, 1030 can work, although 1130 would work better since Jim Bowman, the person who put together the spreadsheets with the claims data could also be on the line. 1030 to 1130 was the only time he could not do the call on Friday, but one of the I.T. people, Micky Lloyd could be on the call at 1030 if that is the only time you can make it. I would be glad to set up a call in number. as for the extension of time to file a motion to compel, I have no problem with granting such an extension, but when you see our response to the remaining issues I don't think a motion will be necessary.

Cc: Jonathan Harling; Mary G. Lewis
Subject: RE: Tuomey claims data dictionary and field layouts

Hi Dan: We have reviewed Defendant's responses to the United States' revised Request for Admission Nos. 1-8. We appreciate your efforts to engage in a meaningful meet and confer and to attempt to address the concerns we raised about the initial responses. While we think some of the responses to the revised requests contain extraneous material, we do not plan to challenge the substance of those responses under Rule 36 or 37.

During the meet and confer, you agreed also to reconsider Defendant's responses to Request for Admission Nos. 9-13 (the items addressed in numbered paragraphs 3 and 4 of my June 16, 2009 letter). We do not believe we have seen any revision to those responses. Can you please inform us whether you intend to revise the responses to these items or not?

Also, Ruben Steck and we are available for a call on Friday morning, as you suggested yesterday, to discuss the production of the hospital's relevant Medicare and Medicaid claims data. Two questions: (1) Will 10:30 am work for you and the Tuomey folks? (2) Our deadline for filing a motion to compel is on Friday (by our prior agreement), and we obviously will not have the claims data in hand by that date because we are going to

be talking about it that same day. Will Tuomey agree to an enlargement of time for the potential filing of a motion to compel sufficient to allow the production and review of the hospital's claims data? (We can discuss what that time period should be during our Friday call.)

Please call me if you have any questions.

Thanks, Dan. Also, we understand that the parties agree that the discussions about the production of Tuomey's claims data, including our lengthy discussion today, concern appropriate supplementation, in accordance with Rule 26(e), of Tuomey's initial Rule 26(a) disclosures and its earlier responses to the government's written discovery requests. Please advise me if you do not agree with this understanding.

Subject: Tuomey data

Hi Tracy,

I was out on vacation for a little over two weeks (mostly without cell reception or email access) – sorry for the slow response.

The Tuomey-provided data (patient-level and transaction-level) appears to provide information for us to compare their claims data to the data we used in our analyses. To perform a complete comparison, however, we will need "look-up tables" for many of the fields. A look-up table provides a list of codes and their meanings (a good example is the CPT codes – each code indicates a specific procedure).

In the patient-level data we see the following fields for which we need to know the possible values and the associated meanings:

- InpatientServiceID
- OutpatientLocationID
- FinancialClassID
- Ins1
- Ins2

In the transaction-level data, we need look-up tables for the following fields:

- Type
- TransProcedureID

We also find five different provider IDs in the patient-level data for which we will need a look-up table to identify the physicians (by UPIN and/or name, at a minimum):

- AdmitProviderID
- AttendProviderID
- ErProviderID
- FamilyProviderID
- OtherProviderID

Please let me know if I can provide any additional information or details, or if you have any questions.

Thanks,
Ruben
